

Installation of MOT Auto Badge

First - look for a place of pride along your MINI's grille or light bar. The method illustrated here will NOT work for all, but worked for me. I secured my badge to the MINI's grille by first drilling two 3/16" holes through the plastic between the grille ribs.

I threaded the supplied bolts onto the badge until it bottomed out and then fitted the badge through the grille. **IMPORTANT - THESE SHOULD BE FINGER TIGHT ONLY!!!**

A quick trip to Home Depot to get Lock Washers and Fender Washers (37¢) I finished the job by placing the big fender washer on first, then the lock washer and nut. Careful when you tighten that you don't over do it.

The result looks good and does not impede airflow over the radiator. Proceeds from the Auto Badge will benefit Rosie's Place and let everyone know you attended the premier MINI event in the Northeast!
